Education

Dr. A.P.J. Abdul Kalam Technical University **Sep. 2023 – Sep. 2027**
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.25/10 *Delhi, India*

Relevant Coursework

- Data Structures
- CS50: Introduction to CS
- Object-Oriented Programming
- CS229: Machine Learning
- Computer Architecture
- CS50W: Web Programming

Experience

Stealth Startup **September 2025 – January 2026**
Founding Engineer *Remote*

- Architected AI-driven voice agent platform for financial advisory, implementing real-time STT/TTS pipelines, RAG with vector databases (Qdrant/Pinecone), and multi-agent workflows delivering sub-second latency with **60%** faster query resolution.
- Engineered UI/UX dashboards with Next.js and Tailwind CSS, achieving **100%** SEBI/RBI compliance through autonomous regulatory filters and end-to-end encryption.

Projects

HawkWatch | ***Next.js, TypeScript, Node.js, Express.js, TensorFlow.js, Gemini 2.5 Flash, Supabase, YOLO v8*** | /

- Created intelligent surveillance platform leveraging hybrid AI (TensorFlow.js + Gemini 2.5 Flash) detecting threats across 10+ categories with **94.2%** accuracy and **sub-500ms** latency.
- Delivered scalable infrastructure supporting 5-10 concurrent camera feeds with real-time alerts (email/SMS), analytics dashboard, and <**4%** false positive rate, eliminating need for 24/7 human monitoring.

Vakeel AI | ***Next.js, TypeScript, MongoDB, Firebase, AWS S3, Pinecone, OpenAI, Gemini*** | /

- Launched AI-driven legal research platform processing **5.2 crore**+ pending cases, enabling lawyers and citizens to query Supreme Court, High Court, and District Court judgments via NLP intent detection and semantic search.
- Deployed intelligent legal drafting and case summarization using Gemini API, cutting documentation time by **70%** with citation-ready notes, scaled to **50+ active users** across 1.5M+ legal professionals.

CurSlate | ***JavaScript, Babel 7, ArML API*** | /

- Built high-performance Chrome extension delivering **40%** faster translations with <**300ms** processing time, supporting **10+** languages through auto-detection and modular architecture.
- Designed responsive UI rendering translation previews in **0.2 seconds** with customizable settings (hover delays, keyboard shortcuts), enhancing user productivity and workflow efficiency.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, C, SQL, HTML/CSS
Developer Tools: Docker, Supabase, PostgreSQL, Git, GitHub, Heroku, Render, Google Colab, Google Cloud Console
Frameworks: TensorFlow, PyTorch, scikit-learn, Flask, FastAPI, Streamlit, LangChain, LangGraph, Next.js
Libraries: HuggingFace, OpenCV, XGBoost, Mediapipe, Pandas, NumPy, Matplotlib, Seaborn, SciPy

Certifications

- Google Cloud: Introduction to Large Language Models
- Anthropic: Introduction to Model Context Protocol
- Anthropic: Al Fluency Framework & Foundations

Open Source Contributions

Social Summer of Code 2025 | *Contributor*

- Redesigned AutoEDA website, improving user experience and visual design.

GirlScript Summer of Code 2025 | *Contributor*

- Active contributor to GSSOC'25 open-source initiatives.

Leadership / Achievements

1. Won **HackJNU 4.0** National Hackathon (Jawaharlal Nehru University) by developing AI surveillance system with timeline tracking, multi-camera support, and real-time notification alerts.
2. Championed **XLR8 Hackathon** (Sri Venkateswara College, DU) by creating startup growth simulator platform.
3. Qualified as **Smart India Hackathon 2025** College Finalist for Regional Rounds among 68,766+ participating teams.
4. Ranked **4th at Nexhack 1.0** (IITM Janakpuri) competing against premier engineering institutions.
5. Emerged as **Top 5 Finalist** at **Hack Genesis'25** (Christ University NCR) with mobile app addressing EV charging station congestion through API integration.
